特殊改質複合塑膠膜、薄板

Special modified composite plastic film, sheet

平膜製造方式 Flat film manufacturing method :

流延法 Casting method

單向延伸法 one-way extension

描述 Description

塑膠粒經過延押設備製程，所生產的塑膠膜與塑膠薄板。

市面上的塑膠膜、薄板諸類產品，在使用上功能性有諸多的不足，我們可以提供特殊複合塑料，經延押設備加工製成膜、薄板，提高、滿足產品的使用性。

The plastic pellets go through the extrusion equipment process to produce plastic films and plastic sheets. The plastic film and sheet products on the market have many functional deficiencies in use. We can provide special composite plastics, which can be processed into films and sheets by extension pressing equipment to improve and meet the usability of the products.

塑膠膜、薄板塑料改質複合的項目 Projects of plastic film and sheet plastic modification and compounding :

- 提高韌性、耐衝擊性、耐寒性、延展性。

Improve toughness, impact resistance, cold resistance, ductility.

- 提高硬度剛性、耐熱性。

Improve hardness, rigidity and heat resistance.

- 提高耐磨性、抗刮性。

Improve wear resistance and scratch resistance.

- 提高抗光性、抗 UV(紫外線)、耐候性。

Improve light resistance, UV resistance (ultraviolet) and weather resistance.

- 提高耐藥性、抗化學性。

Improve drug resistance and chemical resistance.

- 阻燃性。

Flame retardancy.

- 特殊功能性如：光擴散性、遠紅外線反射性、藍光阻隔性、抗靜電與導電性、特殊功能性開發，客製化。

Special functions such as: light diffusivity, far infrared reflectivity, blue light blocking, antistatic and electrical conductivity, special functional development, customization.

- 符合 FDA、醫療級、水資源用特殊級。

Comply with FDA, medical grade, special grade for water resources.

- 合金塑膠製作膜、薄板-PC/ABS。

Good-Plastics

複合塑膠產品開發、銷售專業技術諮詢

專業研發·成效卓著

www.good-plastics.com

Alloy plastic film, sheet-PC/ABS.

厚度 thickness mm

0.05~2.0

幅寬 Width mm

880~2000

塑膠膜、薄板塑料材質 Plastic film, thin plate plastic material :

PE、PP、EVA、TPU、TPV、POM、PA6、PA12、PC、PET、PC/ABS.....等
